MICHAEL BROWN

THE NEW ALGORITHMS

...

...
works that illustrate the relationship between income distribution and economic progress. As a result, workers who are able to organize and collectively bargain for better wages and benefits are more likely to achieve economic mobility and improve their standard of living. The empirical evidence supporting this argument is overwhelming: countries with higher levels of income inequality tend to have lower rates of economic growth and higher levels of poverty and inequality. Consequently, policies that promote greater income equality, such as progressive taxation and social welfare programs, are essential to building a more prosperous and equitable society.
